

Job - File Review and Understanding

Good — we'll rewrite this properly for LinkedIn.

Your Education section should:

- Be clean
- Not look school-level
- Not be too long
- Still show leadership & initiative
- Avoid informal wording

Here is the optimized LinkedIn version:

Mahindra University

Bachelor of Technology (B.Tech), Mechanical Engineering

Jun 2018 – Jul 2022

Grade: 7.5/10

Activities & Leadership:

- Active member of Zenith Science Club; contributed to organizing the MU Research Symposium 2020 and other technical events promoting research and innovation.
 - Volunteer, AIRO Sports Meet (2019–2020); served on operations and security team supporting large-scale campus events and logistics coordination.
-

Why This Version Is Better

- Clean formatting
 - Professional tone
 - No repetition
 - No incomplete sentences
 - No informal phrasing
 - No over-explanation
-

Optional (If You Want Slightly Stronger Framing)

You can add one technical line:

- Completed coursework focused on computational modeling, numerical methods, and engineering systems analysis.

Only add this if your Education section looks light.

If you want next, we can optimize:

- 🔥 Your LinkedIn Skills (global 20–25 skills strategy)
- 🔥 Your LinkedIn headline for maximum recruiter search
- 🔥 Or your LinkedIn banner strategy (very underrated but powerful)
